Semi-Annual Report 2019

## Canadian Utilities & Telecom Income Fund

### Letter to Unitholders

We are pleased to present the 2019 semi-annual report containing the management report of fund performance and the unaudited financial statements for Canadian Utilities & Telecom Income Fund (the “Fund”).

Stock markets around the world advanced in the first half of 2019 recouping losses from the volatile markets at the end of 2018. The S&P 500 Index rose to new all-time highs as investors looked past the potential consequences of a global trade war and focused on the pivot in central bank policy from tighter conditions to anticipating looser monetary policy in the future. For the first six months of 2019, the S&P 500 Index and S&P/TSX Composite Index advanced 18.5 percent and 16.2 percent, respectively. Global markets followed the positive tone set by U.S. stocks with the MSCI EAFE Index up 14.5 percent and the MSCI Emerging Markets Index up 10.7 percent. The Federal Reserve Open Market Committee (“FOMC”), which appeared to be on the most aggressive path of tightening after raising the overnight interest rate four times in 2018, paused in the first six months of 2019 leaving the target rate at 2.5 percent. The short-end of the yield curve in the United States reacted by pricing in the probability of several rate cuts by the FOMC as 2-year yields plummeted from 2.49 percent at year end to 1.75 percent at the end of June 2019. Long-term interest rates also reacted ending the second quarter at 2.00 percent versus 2.68 percent to start the year. This dynamic has caused the yield curve (10-2 Year) to steepen slightly but remains just 25 basis points from being inverted, a condition often associated with an imminent recession. Oil prices recovered in the first half of 2019 with the Bloomberg WTI Cushing Crude Oil Spot price rising to US\$58.47 per barrel on June 28, 2019, up 28.8 percent from US\$45.41 at the end of 2018. Meanwhile, other commodities did not fare as well with copper prices rising 2.1 percent, aluminum down 12.3 percent and natural gas off 24.1 percent year-to-date. Volatility, as measured by the Chicago Board Options Exchange Volatility Index (“VIX”), declined in the first half of 2019 falling from 25.4 at the end of 2018 to 15.1 at the end of June. Given the uncertainty surrounding the global political landscape, trade war rhetoric, The United States-Mexico-Canada Agreement renegotiations, declining economic data, along with the Federal Reserve continuing to pivot monetary policy, we remain cautiously optimistic on global stock markets with the view that volatility is likely to remain elevated compared to the low levels witnessed over the past few years.

During the six months ended June 30, 2019, the Fund paid cash distributions of \$0.33 per unit. The net asset value per unit increased from \$8.72 at December 31, 2018 to \$9.52 at June 30, 2019. The total return of the Fund, including the reinvestment of distributions, was 13.0 percent for the period. The net realized gain on options attributable to Strathbridge Selective Overwriting strategy (see “The Fund”) amounted to \$0.09 per unit compared to a net realized gain on options of \$0.03 per unit a year ago. For a more detailed review of the operations of the Fund, please see the Results of Operations and the Portfolio Manager Report Sections.

We thank all unitholders for their continued support and encourage unitholders to review the detailed information contained within the semi-annual report.

John P. Mulvihill  
Chairman & CEO  
Strathbridge Asset Management Inc.

### The Fund

The Fund is a closed-end investment trust designed to maximize total returns for unitholders including both long-term appreciation in net asset value (“NAV”) per unit and to pay unitholders monthly distributions in an amount targeted to be 7.0 percent per annum on the NAV of the Fund. The units are listed on the Toronto Stock Exchange (“TSX”) under the ticker symbol UTE.UN.

To accomplish its objectives, the Fund invests at least 75 percent of the value of the Fund in securities of Utilities and Communication Services issuers listed on the TSX which have a minimum market capitalization of \$1 billion and a current minimum distribution yield of 2.0 percent per annum at the time of investment. In addition, up to 25 percent of the value of the Fund may be invested in securities of North American issuers in the Utilities and Communication Services sectors which have a minimum market capitalization of \$250 million and a minimum distribution yield of 2.0 percent per annum at the time of investment. The Fund may also invest in public investment funds including exchange-traded funds and other Strathbridge Funds (provided that no more than 15 percent of the net asset value of the Fund may be invested in securities of other Strathbridge Funds) that provide exposure to such securities.

The Fund employs a proprietary investment strategy, Strathbridge Selective Overwriting (“SSO”), to enhance the income generated by the portfolio and to reduce volatility. The Fund may, from time to time, selectively write covered call options in respect of up to a maximum of 25 percent of the securities in the portfolio. In addition, the Fund may write cash covered put options in respect of securities in which it is permitted to invest.

The SSO strategy is a quantitative, technical based methodology that identifies appropriate times to write and/or close out option positions compared to writing continuously and rolling options every thirty days. This proprietary process has been developed over many years through various market cycles. The Manager believes the primary benefit to investors is to maximize the total return of the particular portfolio while reducing the level of volatility of the portfolio, thereby increasing the risk-adjusted return.

### Recent Developments

There were no recent developments pertaining to the Fund during the six months ended June 30, 2019.

### Related Party Transactions

Strathbridge Asset Management Inc. (“Strathbridge”), as the Investment Manager of the Fund, manages the investment portfolio in a manner consistent with the investment objectives, strategy and criteria of the Fund pursuant to an Investment Management Agreement made between the Fund and Strathbridge dated November 26, 2010.

Strathbridge is the Manager of the Fund pursuant to a Trust Agreement made between the Fund and Strathbridge dated November 26, 2010. As such, Strathbridge is responsible for providing or arranging for required administrative services to the Fund.

Strathbridge is paid the fees described under the Management Fees section of this report.

During the period, no recommendations or approvals were required to be sought from the Independent Review Committee (“IRC”) concerning related party transactions.

### Independent Review Committee

National Instrument 81-107 – Independent Review Committee for Investment Funds (“NI 81-107”) requires all publicly offered investment funds to establish an IRC to whom the Manager must refer conflict of interest matters for review or approval. NI 81-107 also imposes obligations upon the Manager to establish written policies and procedures for dealing with conflict of interest matters, maintaining records in respect of these matters and providing assistance to the IRC in carrying out its functions. The Chief Compliance Officer, designated by the Manager, is in charge of facilitating the fulfillment of these obligations.

The IRC will prepare, for each financial year, a report to securityholders that describes the IRC and its activities during such financial year and includes, if known, a description of each instance when the Manager acted in a conflict of interest matter for which the IRC did not give a positive recommendation or for which a condition, imposed by the IRC, was not met in its recommendation or approval. Members of the IRC are Robert W. Korthals, Michael M. Koerner and Robert G. Bertram.

(1) The management expense ratio ("MER") is the sum of all fees and expenses for the stated period, including harmonized sales tax but excluding transaction fees, divided by the average net asset value. Generally, the MER increases when the Fund becomes smaller in size due to redemptions. The MER for 2019, 2018, 2017, 2016, 2015 and 2014, excluding withholding taxes, is 3.01%, 2.76%, 2.34%, 2.17%, 2.27% and 2.13% respectively. The MER for 2015 and 2014 includes the special resolution expense/(recovery). The MER for 2015 and 2014 excluding the special resolution expense/(recovery) is 2.37% and 2.13% respectively.

(2) Portfolio turnover rate is calculated based on the lesser of purchases or sales of investments, excluding short-term investments, divided by the average value of the portfolio securities. The Fund employs an option overlay strategy which can result in higher portfolio turnover by virtue of option exercises, when compared to a conventional equity mutual fund.

Management Report of Fund Performance

## Management Report of Fund Performance

### Management Fees

Strathbridge, as the Investment Manager of the Fund, is entitled to fees under the Investment Management Agreement calculated monthly as 1/12 of 1.00 percent of the net asset value of the Fund at each month end. Services received under the Investment Management Agreement include the making of all investment decisions and writing of covered call options in accordance with the investment objectives, strategy and criteria of the Fund. Strathbridge also makes all decisions as to the purchase and sale of securities in the Fund's portfolio and as to the execution of all portfolio and other transactions.

Strathbridge, as the Manager of the Fund, is entitled to fees under the Trust Agreement calculated monthly as 1/12 of 0.10 percent of the net asset value of the Fund at each month end. Services received under the Trust Agreement include providing or arranging for required administrative services to the Fund.

### Past Performance

The following chart sets out the Fund's year-by-year past performance. It is important to note that the:

- (1) information shown assumes that all distributions made by the Fund during these periods were reinvested in units of the Fund,
- (2) information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns, and
- (3) past performance of the Fund does not necessarily indicate how it will perform in the future.

### Year-By-Year Returns

The following bar chart illustrates how the Fund's total return varied from year to year for each of the past nine years and for the six months ended June 30, 2019. The chart also shows, in percentage terms, how much an investment made on January 1 in each year or the date of inception on December 17, 2010 would have increased or decreased by the end of the fiscal year or June 30, 2019 for the six months ended.

### Total Return

<sup>(1)</sup> For the period from December 17, 2010, the inception of the Fund, to December 31, 2010. The return was negative 0.1 percent.

<sup>(2)</sup> For the six months ended June 30, 2019.

### Portfolio Manager Report

Stock markets around the world advanced in the first half of 2019 recouping losses from the volatile markets at the end of 2018. The S&P 500 Index rose to new all-time highs as investors looked past the potential consequences of a global trade war and focused on the pivot in central bank policy from tighter conditions to anticipating looser monetary policy in the future. For the first six months of 2019, the S&P 500 Index and S&P/TSX Composite Index advanced 18.5 percent and 16.2 percent, respectively. Global markets followed the positive tone set by U.S. stocks with the MSCI EAFE Index up 14.5 percent and the MSCI Emerging Markets Index up 10.7 percent. The Federal Reserve Open Market Committee (“FOMC”), which appeared to be on the most aggressive path of tightening after raising the overnight interest rate four times in 2018, paused in the first six months of 2019 leaving the target rate at 2.5 percent. The short-end of the yield curve in the United States reacted by pricing in the probability of several rate cuts by the FOMC as 2-year yields plummeted from 2.49 percent at year end to 1.75 percent at the end of June 2019. Long-term interest rates also reacted ending the second quarter at 2.00 percent versus 2.68 percent to start the year. This dynamic has caused the yield curve (10-2 Year) to steepen slightly but remains just 25 basis points from being inverted, a condition often associated with an imminent recession. Oil prices recovered in the first half of 2019 with the Bloomberg WTI Cushing Crude Oil Spot price rising to US\$58.47 per barrel on June 28, 2019, up 28.8 percent from US\$45.41 at the end of 2018. Meanwhile, other commodities did not fare as well with copper prices rising 2.1 percent, aluminum down 12.3 percent and natural gas off 24.1 percent year-to-date. Volatility, as measured by the Chicago Board Options Exchange Volatility Index (“VIX”), declined in the first half of 2019 falling from 25.4 at the end of 2018 to 15.1 at the end of June. Given the uncertainty surrounding the global political landscape, trade war rhetoric, The United States-Mexico-Canada Agreement renegotiations, declining economic data, along with the Federal Reserve continuing to pivot monetary policy, we remain cautiously optimistic on global stock markets with the view that volatility is likely to remain elevated compared to the low levels witnessed over the past few years.

For the six months ended June 30, 2019, the net asset value (“NAV”) per unit was \$9.52 compared to \$8.72 per unit at December 31, 2018. Unitholders received cash distributions of \$0.33 per unit during the period. The Fund’s units listed on the Toronto Stock Exchange as UTE.UN, closed on June 28, 2019 at \$9.23 per unit, which represents a \$0.29 or 3.0 percent discount to the NAV per unit.

The total return of the Fund, including reinvestment of distributions, for the six months ended June 30, 2019 was 13.0 percent. In comparison, the S&P/TSX Capped Utilities Index, the S&P/TSX Capped Telecommunication Services Index and the S&P/TSX Composite Oil & Gas Storage & Transportation GICS Index returned 22.4 percent, 8.9 percent and 22.4 percent, respectively. The best performing stock within the portfolio was TC Energy Corp. which rose 36.4 percent while held in the portfolio. At the other end of the spectrum, Verizon Communications Inc. was the laggard, down 6.7 percent while held in the Fund.

Volatility was generally lower in the first half of 2019 after starting the year at an elevated level. The covered call writing activity was opportunistic over the period and took advantage of signals generated by the Strathbridge Selective Overwriting (“SSO”) strategy. The Fund ended June 30, 2019 with 7.6 percent of the portfolio subject to covered calls and 6.5 percent weight in cash. The average cash position for the first half of 2019 was 6.0 percent. The U.S. dollar exposure was actively hedged back into Canadian dollars throughout the period and ended June with approximately 50 percent of the U.S. dollar exposure hedged.

#### Forward-Looking Statements

This report may contain forward-looking statements about the Fund. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” or negative versions thereof and similar expressions. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also forward-looking. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to any divergence between what is anticipated and what actually occurs, including, but not limited to, general economic, political and market factors, interest and foreign exchange rates, global equity and capital markets, business competition, technology change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

The above-mentioned list of important factors is not exhaustive. You should consider these and other factors carefully before making any investment decisions and you should avoid placing undue reliance on forward-looking statements. While the Fund currently anticipates that subsequent events and developments may cause the Fund's views to change, the Fund does not undertake to update any forward-looking statements.

## 1. Basis of Presentation

The condensed semi-annual financial statements for Canadian Utilities & Telecom Fund (the “Fund”) have been prepared in compliance with International Financial Reporting Standards (“IFRS”), specifically the International Accounting Standard (“IAS”) 34 Interim Financial Reporting. However, not all disclosures required by IFRS for annual financial statements have been presented and, accordingly, these condensed semi-annual financial statements should be read in conjunction with the most recently prepared annual financial statements for the year ended December 31, 2018.

These condensed semi-annual financial statements follow the same accounting policies and method of application as the most recent audited financial statements for the year ended December 31, 2018.

These condensed financial statements were approved by the Board of Advisors on August 7, 2019.

## 2. Risks Associated with Financial Instruments

The various types of risks associated with its investment strategies, financial instruments and markets in which the Fund invests remain unchanged from the prior year and are described in Note 6 of the audited financial statements for the year ended December 31, 2018.

### Credit Risk

As at June 30, 2019 and December 31, 2018, the counterparties to the Fund’s derivative financial instruments had a credit rating of A-1 or higher from Standard & Poor’s Ratings Services.

The analysis below summarizes the credit quality of the Fund’s short-term investments as at June 30, 2019 and December 31, 2018.

Credit Rating	Percentage of Short-Term Investments	
	June 30, 2019	Dec. 31, 2018
AAA	–	100.0%

### Liquidity Risk

The amounts in the table are the contractual undiscounted cash flows:

	\$ –	\$ 150,319	\$	150,319

### Market Risk

#### (a) Currency Risk

The table below indicates the foreign currencies to which the Fund had significant exposure to as at June 30, 2019 and December 31, 2018 in Canadian dollar terms, and the notional amounts of forward exchange contracts. The table also illustrates the potential impact on the net assets attributable to equity holders if the Canadian dollar had strengthened or weakened by 5 percent in relation to each of the other currencies, with all other variables held constant.

	As at June 30, 2019					
	U.S. Currency Exposure					
				Impact on Net Assets Attributable to Equity Holders		
	Monetary	Non-Monetary	Total	Monetary	Non-Monetary	Total
	\$ (400,306)	\$ 1,141,636	\$ 741,330	\$ (20,015)	\$ 57,082	\$ 37,067
% of Net Assets Attributable to Equity Holders	(3)%	8%	5%	0%	0%	0%

	As at December 31, 2018					
	U.S. Currency Exposure					
				Impact on Net Assets Attributable to Equity Holders		
	Monetary	Non-Monetary	Total	Monetary	Non-Monetary	Total
	\$ (1,365,372)	\$ 3,317,155	\$ 1,951,783	\$ (68,269)	\$ 165,858	\$ 97,589
% of Net Assets Attributable to Equity Holders	(9)%	22%	13%	0%	1%	1%

#### (b) Price Risk

Approximately 110 percent (December 31, 2018 – 88 percent) of the Fund's net assets attributable to equity holders held at June 30, 2019 were publicly traded equities. If equity prices on the exchange increased or decreased by 5 percent as at June 30, 2019, the net assets attributable to equity holders would have increased or decreased by \$0.8 million (December 31, 2018 – \$0.7 million) respectively or 5.5 percent (December 31, 2018 – 4.4 percent) of the net assets attributable to equity holders all other factors remaining constant. In practice, actual trading results may differ and the difference could be material.
